Storm Water Management Plan

# CENTRAL STATE HOSPITAL'S STORMWATER MANAGEMENT GOALS

To support the Clean Water Act by:

- Prevention of contamination of storm water.
- Education of our employees.
- Surveillance of our storm water system.
- Correction of any deficiencies found during surveillance.

## PREVENTION

CSH has an active program for the prevention of contamination of the Chesapeake Bay and its tributaries through the following activities:

- Proper storage and disposal of chemicals, hazardous material, gas, oil and other pollutant material.
- Maintenance and inspection of grounds, sewer systems and Cattail Run and Rohoic Creek.
- Education.
- Special volunteer clean up projects.
- Non-use of pesticides & fertilizers.
- Emergency call in number (804) 524- 7557 to report any suspected or actual contamination.

# EDUCATION

The goal of education is to raise the awareness of storm water contamination thereby reducing or eliminating potential sources of contamination.

Sources of education are:

- New & annual employee training.
- Technical training for all Support Services Staff who must maintain the integrity of the storm water system at CSH.
- Monthly/quarterly reminders in the Hospital's Monthly Newsletter
- – Central State Hospital's Web site. (Public information)

# SURVEILLANCE OF CENTRAL STATE HOSPITAL'S STORM WATER SYSTEM

- ❖ Physical Plant Services has the primary responsibility of monitoring/inspecting the grounds and the storm water system.
- ❖ Employees and the general public have the responsibility to report potential or real contamination by calling 804-524-4723 or 804-524-7557.

# CORRECTION OF DEFICIENCIES

Correction of deficiencies found or reported is the sole responsibility of Physical Plant Services.

Corrections may be within the capabilities of CSH or qualified Contractors and will be reported to proper authorities if the contamination source and subsequent remediation is not within the abilities of Central State Hospital or its Contractors.
